Description

The Blaze Glass Front Outdoor Beverage Cooler is the perfect drink station for entertaining, with helpful features and a massive capacity to keep the party going. For starters, the unit is made from ultra-durable, 304-grade stainless steel for longevity in outdoor spaces. Beech and glass shelving are available to easily personalize the look and feel of the cooler, while the added beech racks allow you to transform it into a full-blown wine fridge! In terms of capacity, this cooler is hard to beat: it can hold a combination of 84 cans and 22 wine bottles, or 42 cans and 62 wine bottles. Whatever configuration you choose, the unit's glass front lets you monitor your contents without opening the door and releasing that precious chill. You can conveniently manage those chilly temperatures via the digital thermostat, then stay informed of its precision with the temperature display. The Blaze Glass Front Outdoor Beverage Cooler also comes with a 1-year limited warranty, not to mention top-of-the-line customer support, for peace of mind.
