Name: A Knights Tower
Series: Theme Play
Age Group:
# of Play Activities:
Child Capacity:
Use Zone:
Max Fall Height:
Equipment or Structure Size: 20'-11" x 19'-3" x 17'-5"
Structure Weight

Description Themed play sparks imagination and promotes social interaction, fostering collaboration and communication skills. Perfect for building connections.

Many organizations like park and recreation districts, city councils, Landscape Architects, and even some school districts desire a play space that stands out from the other local playgrounds. You are looking for something that will attract families and create a community play space that will create cherished memories.

Theme Play playgrounds furnish themed based play components that give you the opportunity to create a playground that mimics a castle, a sailing ship, a wild west fort or a space station. With its large supports, broad platforms and a wide spectrum of colors to choose from, a Theme Play playground can be the focal point of your family park. Based on Maximo, this system can handle end-user volumes without constricting the excitement and enthusiasm found in the flow of play. The time-tested reliability of the materials sourced for and combined with the skilled craftmanship at the factory, produces equipment that is durable and requires less maintenance over time, so that your play space remains fun, inviting and open to the public.

Theme Play playgrounds are artistically crafted with your choice of 5.0" OD galvanized steel or aluminum support posts which are, along with all of the steel handrails, barriers, gates, and climbers, coated with a baked-on polyester powder coat finish for a lifetime of protection against the elements. All steel decking and stairs are encased in a long????lasting PVC coating. The three-dimensional plastic slides, panels, roofs, and climbers are rotationally

molded using virgin compounded resins that feature greater UV breakdown resistance over dry blended resins. The HOPE sheet plastic climbers and activities are specifically manufactured at the factory for highquality control and not purchased from a supplier.
