Hot Coal Bin P675 $637.00

https://www.dunriteplaygrounds.com/store2/Hot-Coal-Bin-P675

Product Image

Description

Hot Coal Bin P675, model P675, is a commercial steel hot-coal disposal bin intended as a dedicated accessory for charcoal grill areas. Its grated top permits users to place spent cooking coals into an enclosed bin rather than into ordinary litter containers.

Exact model specifications

Manufacturer model	P675
2026 listed configuration	HOT COAL BIN
Bin body	Formed and welded 10-gauge steel
Top	Formed and welded 12-gauge steel
Grate	1/2-inch steel rod
Receptacle	30-gallon galvanized metal container included
Size	33-7/16 inches tall by 23-3/4 inches square
Access	Door with heavy-duty lift-off hinges

Configuration and ordering comparison

This product	Dedicated coal collection bin with included metal liner
Park receptacle	Standard waste receptacles are not a substitute for hot-coal disposal
Companion use	Specify separately from charcoal grills

The published manufacturer specification lists a 10-gauge fabricated steel body and door, 12-gauge steel top, half-inch steel rod grate and an included galvanized 30-gallon container. A heavy-duty lift-off-hinge door provides service access to the inner receptacle. The bin is powder coated and its stated dimensions support placement planning for outdoor picnic and campground facilities. Locate it according to the facility fire-safety plan and keep combustible waste separate. The grill itself is sold separately, and handling, cooling, inspection and disposal practices must follow local fire rules and operator procedures.
