Description

Drive-In Ground Anchor Kit M-DANC

Drive-In Ground Anchor Kit M-DANC, manufacturer model M-DANC, is a separately listed UltraSite mounting or service accessory. It is identified as drive-in ground anchor kit; the exact 2026 catalog line specifies manufacturer-listed standalone ground anchoring accessory.

Exact model specifications

Manufacturer model	M-DANC
2026 listed configuration	Drive-in Ground Anchor Kit
Accessory function	Drive-in ground anchor kit
Model-specific condition	Manufacturer-listed standalone ground anchoring accessory
Complete equipment included	No

Configuration and ordering comparison

This model	Manufacturer-listed standalone ground anchoring accessory
Alternative or compatibility note	Verify site soil and compatible equipment before specifying
Installation	Check manufacturer mounting detail and actual site condition

The accessory is not a substitute for the principal bench, furnishing, post or structure to which it attaches. The choice of tube diameter, pair count, anchoring material and installation method can change compatibility, so compare the exact model designation with the equipment drawing before ordering. For installations in concrete or soil, determine the foundation and corrosion requirements from the engineering and manufacturer instructions, rather than applying a generic anchor detail. No compatible parent product is bundled with this line item, and the available source does not establish universal fit across unrelated UltraSite collections. Confirm whether other mounting hardware is supplied with the parent SKU before ordering duplicates.
