Configuration and ordering comparison

This model	Sold in pairs for 2-3/8-inch outside-diameter tube
Alternative or compatibility note	G-01-04-0544 covers the other tube diameter
Installation	Check manufacturer mounting detail and actual site condition

The accessory is not a substitute for the principal bench, furnishing, post or structure to which it attaches. The choice of tube diameter, pair count, anchoring material and installation method can change compatibility, so compare the exact model designation with the equipment drawing before ordering. For installations in concrete or soil, determine the foundation and corrosion requirements from the engineering and manufacturer instructions, rather than applying a

generic anchor detail. No compatible parent product is bundled with this line item, and the available source does not establish universal fit across unrelated UltraSite collections. Confirm whether other mounting hardware is supplied with the parent SKU before ordering duplicates.
