Product Image

Description

Built for slam workouts, this Reactor by Champion Barbell® Smash Ball provides a great tool for developing strength, explosiveness and endurance in athletes. Users will better engage core and stabilizer muscles thanks to the sand-filled center that shifts during workout movements to enhance overall strength. Whether being used at a fitness center or school weight room, this weighted ball can withstand high-velocity impacts without splitting or bursting open when thrown repeatedly against the floor or wall.

- Smash ball is great for incorporating into most workout routines for added resistance
- Latex-free PVC cover stands up to intense slam workouts without splitting or cracking
- Textured surface delivers a sure grip for control during demanding exercises
- Sand-filled center shifts the balls weight to engage users core and stabilizer muscles
- Available in a variety of weights and diameters to suit a wide range of athletic levels and needs
