## Description

---

If you've got raccoons nearby, this is your trash can. The all steel construction includes a galvanized, 32 gallon can that fits into the mechanism. Trash is easily introduced into the can by opening the recessed, tilt-back front lid. The entire lid mechanism clamps down on the can and holds it securely in place. When the release latch on the back is triggered, the lid can be swung backward to empty the can. Until then, it will foil any scavengers. Its important features are:

All steel construction with polyester powdercoat finish

Includes 32 gal. galvanized receptacle as show

Frame has four surface mount holes on frame for permanent placement
